

REMOTE SENSING FOR CROP RESEARCH AND MANAGEMENT SURVEY

Here's the link to the survey: [Remote Sensing for Crop Research and Management Survey](#)

This survey will take less than 5 minutes to complete.

This information will help me and my colleagues in understanding the current state of remote sensing technology in the turfgrass industry, and help define objectives of a research project to address issues and challenges related to the adoption and widespread use of this technology.

Thanks for your help with this process.

Best regards,

Ambika

Ambika Chandra, Ph.D.
